

Jurusan Teknologi Informasi Politeknik Negeri Malang

Jobsheet-7: Pengenalan JSON, penggunaan postman, Public API, Restful API, cURL

Mata Kuliah Pemrograman Web Lanjut

Pengampu: Tim Ajar Pemrograman Web Lanjut

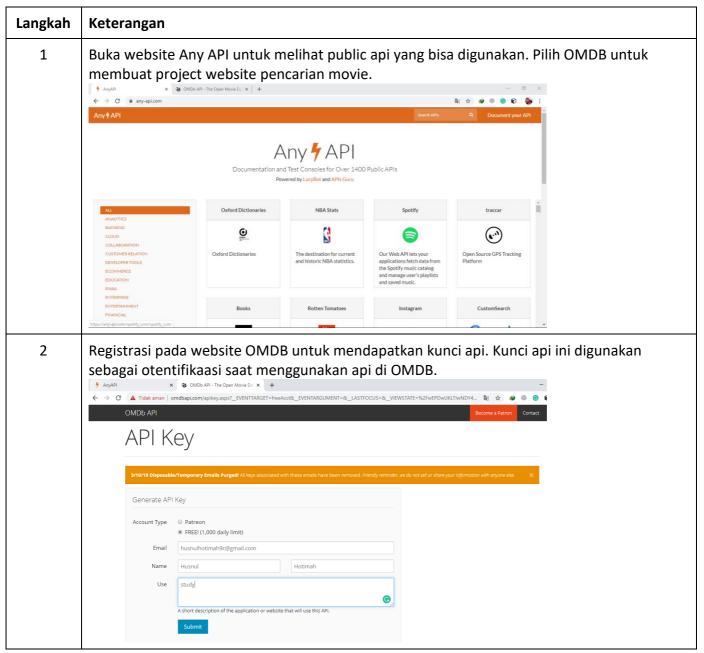

Februari 2020

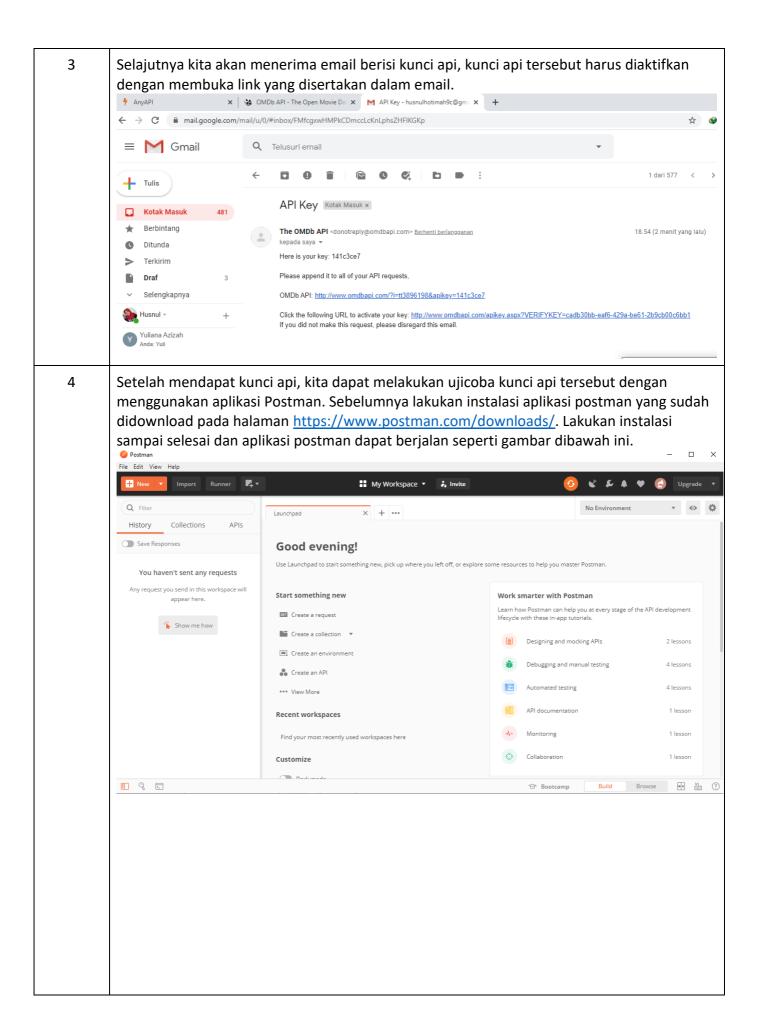

NAMA : HUSNUL HOTIMAH

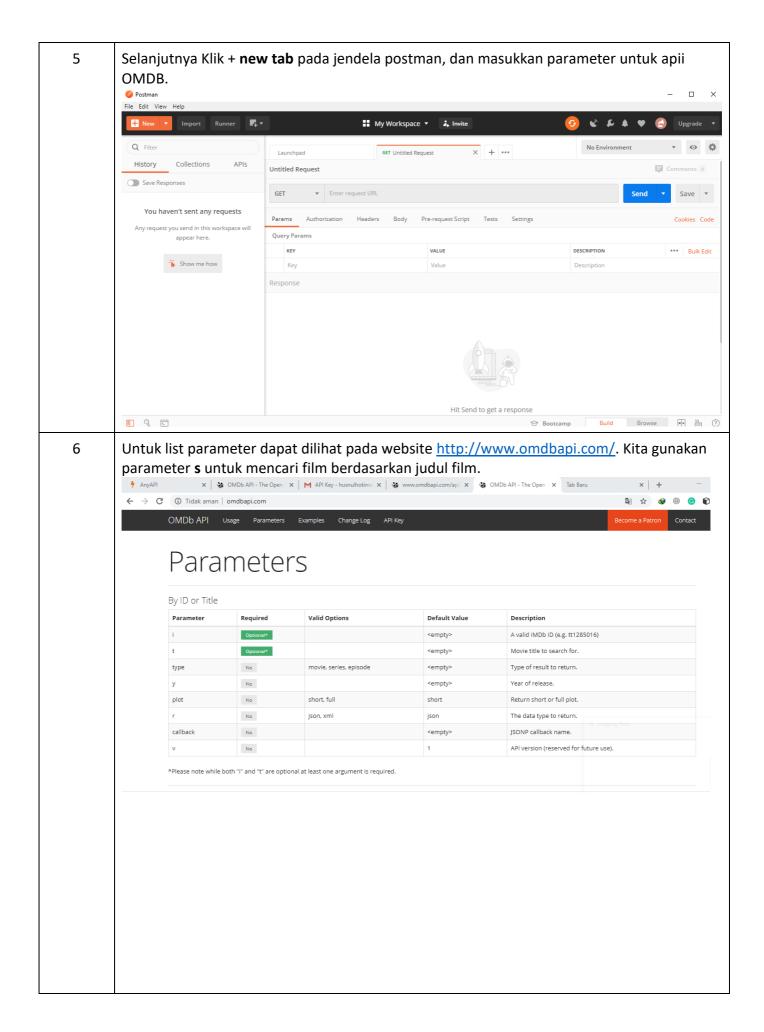

NIM : 1841720014

KELAS : TI-2A

Praktikum – Bagian 1: Registrasi Account di layanan Public API dan Test API menggunakan Postman

7 Masukan parameter key dan value berupa api key, value berupa key, code pencarian s dan judul film yang akan dicari, misalnya terminator. 9 Kita juga dapat mencari detail dari sebuah film dengan menggunakan parameter i. hasilnya akan didapatkan data detail dari sebuh film berdasarkan imdbID. Misal kita mencari film dengan ID tt0418279. Maka akan ditampilkan informasi detail dari film tersebut. Selanjutnya kita bisa memasukkan JSON kedalam aplikasi codeigniter untuk membuat tampilan aplikasi yang lebih menarik. ```
Langkah
               Keterangan
     1
               Duplikasi Project Code-Ketiga dan berilah nama project Code-ketujuh
    2
               Lakukan perubahan konfigurasi $config['base url'] = 'http://localhost/rest-api/Code-
               ketujuh/'; pada config.php
                           $config['base_url'] = 'http://localhost/code-ketujuh/';
    3
               Buatlah sebuah file index.php pada folder view/movie/ dan tuliskan script seperti gambar
               dibawah ini:
                     views
                       > errors
                       > home
                       > Login
                       > mahasiswa

∨ movie

                        💏 index.php
                 en config.php
                               💝 index.php •
                 application > views > movie > 💝 index.php > ...
                          aria-label = "Recipient's username" aria-describedby="button-addon2"
                             <div class="input-group-append">
<button class="btn btn-primary ml-2" type="button" id="btn-search">Search<i class="fa fa-search"></i></button>
                            clus= modal-content >

<div class="modal-header">

<h5 class="modal-title" id="exampleModalLabel">Movie Details</h5>

<button type="button" class="close" data-dismiss="modal" aria-label="Close">

<span aria-hidden="true">&times;</span>
                              <div class="modal-body":</pre>
                              div class="modal-footer">
<button type="button" class="btn btn-secondary" data-dismiss="modal">Close</button>
```

4 Buatlah sebuah file controller **Movie.php** pada folder **controller** dan tuliskan script seperti gambar dibawah ini:

```
controllers
 Home.php
 index.html
 login.php
 mahasiswa.php
 Movie.php
                 😭 index.php
                                  m Movie.php ×
config.php
application > controllers > 🦛 Movie.php > ...
       <?php
       defined('BASEPATH') OR exit('No direct script access allowed');
       class Movie extends CI_Controller{
           public function index()
               $this->load->view('template/header');
               $this->load->view('movie/index');
               $this->load->view('template/footer');
       ?>
```

Selanjutnya buat file javascript **script.js** pada folder **assets/js/** kemudian tuliskan script seperti gambar dibawah ini:

```
✓ assets
✓ assets
✓ js
Js bootstrap.bundle.js
Js bootstrap.bundle.js.map
Js bootstrap.bundle.min.js
Js bootstrap.bundle.min.js.map
Js bootstrap.js
Js bootstrap.js
Js bootstrap.js.map
Js bootstrap.min.js
Js bootstrap.min.js
Js script.js
```

```
assets > js > JS script.js > 🕅 on('click', '#btn-details') callback > f9 data > f9 'apikey'
                                  searchMovies();
                        searchMovies();
               $('#movie-list').on('click', '#btn-details', function(e){
                        $.ajax({
                                 type: 'GET',
dataType: 'json',
                                 data: | data: 
                                  success: function(result){
  if(result.Response === "True"){
                                                 <img src="` + result.Poster +`" class="img-fluid">
                                                                     assets > js > JS script.js > 🕅 on('click', '#btn-details') callback > 🔑 data > 🔑 'apikey'
                                                                       Plot : `+ result.Plot +`
                 function searchMovies(){
                         $.ajax({
                                  type:'GET',
dataType:'json',
                                            's': $('#search-text').val()
                                   success: function(result){
                                            let movies = result.Search;
                                            $('#movie-list').html('');
                                            if(result.Response == "True"){
    $.each(movies, function(i, data){
                                                               <img src="`+ data.Poster +`" class="card-img-top" height="300px">
                                                                         <div class="card-body"><h5 class="card-title">`+ data.Title +`</h5>
                                                                         <a href="#" class="btn btn-primary" id="btn-details" data-id="`+ data.imdbID +`"</pre>
                                                                       data-toggle="modal" data-target="#exampleModal">Show Details</a> </div></div></div>
                                                              $('#search-text').val("");
```

6 Tambahkan script pada **footer.php** pada folder **template** seperti gambar dibawah ini: 🦬 footer.php application > views > template > ♠ footer.php > ... -- Optional JavaScript --> 7 Tambahkan juga script pada header.php pada folder template seperti gambar dibawah ini: ation > views > template > 🦇 header.php > 🤡 html > 🤡 body > 🤣 nav.navbar.navbar-expand-lg.navbar-light.bg-light <!doctype html
<html lang="en"</pre> <!-- Required meta tags -->
<meta charset="utf-8"> <meta name="viewport" content="width=device-width, initial-scale=1, shrink-to-fit=no"> clink rel="stylesheet" href="<?= base url();?>assets/css/bootstrap.css">
